OR If you wish to support the legal compliance or soundness of this policy, or its compliance with the duty to co-operate. (Required) Small rural settlements (group 4) are disadvantaged as far as the 'Neighbourhood Plan' route as is concerned as they are too small and do not always have sufficient permanent residents to provide the resource to do this. I note that so far it is group 2 and 3 settlements that have chosen to do this. It is not clear whether in a small village it will still be possible for a private individual landowner to apply for building permission or whether this will only be possible if supported by a community led needs assessment. The problem with this is that it may be too big a task for a small community to undertake. In such a community it may be impossible to develop such an assessment especially in a village with predominantly tenanted houses - tenants on a 6 month tenancy agreement have little interest in the longer term sustainability of the community - a catch 22!
