

With ref to the Melton local plan (MLP) I would like it on record that a. Bottesford is not a town and I wish for the word to be removed from the document b. I oppose the plan to instigate building houses, affordable or not within the village.
c. I think that the infrastructure and services are already under strain, and out of date.
d. Schools are already under strain, more children will tax an already low return.
e. Traffic through the village is already chaotic and dangerous, we need speed bumps to slow vehicles and cameras to catch offenders

The new houses already being built are neither affordable to young villagers, nor are the homes already sold being purchased by villagers.

Doctors in this village are already overstretched, and also serve surrounding areas, where could new households find these services?

Flooding has been a problem here, over the last 20 years and indeed last week the main road was flooded with almost another accident because the flood warnings hadn't been adhered to.

Local services ie bus, train, are under threat, and with more cars on the roads, there will be an increased wear on road surfaces, Policing, we don't have a police station, Fuel, we don't have a fuel station.

I don't think we even have a crossing patrol now We also don't have a safe crossing over the A52 promised years ago.

Thank you in anticipation of an acknowledgement

Jacqueline Francis
