Comments:

The Neighbourhood Plan is a very wide ranging, well thought out study of Frisby on the Wreake. It looks at the impact of housing on the village from a large number of perspectives and the effect this would have both on the village itself and its inhabitants. It is a massive undertaking in which a considerable amount of time has been invested by villagers and as such is to be highly commended.

Although it will inevitably need updating from time to time it provides a reference that everyone can turn to to obtain information about village life for many years to come.

Most importantly it helps to maintain and preserve a reasonably small community who value the beauty of the countryside, wildlife and the peaceful environment we are blessed with. It is highly significant in providing the sort of protection we need to preserve what we value highly in Frisby without letting those on the outside who do not know us dictate their own terms.

From the perspective of the Anglican Church in Frisby we still have a small community which as far as pastoral care for the sick and elderly is concerned is manageable . People know each other and can therefore care for one another in more depth than many other communities. Frisby has on more than one occasion been called a Christian village.

A very large vote of thanks must be given to all those who gave of their time to compile this very significant work.
